

## Website Maintenance

You've got a great business website which is visited by both potential and existing customers every day. Unfortunately that's not enough - in today's fast paced society, the web is constantly changing and technologies are continually being updated. Think of your website like a car - it might be a compact runaround or a powerful sports car - but you need to ensure it's serviced regularly to keep it running.

Our plans will give you peace of mind that your site is protected from security risks, data loss, and is performing at its best. We offer a variety of options, starting with just the basics to keep your site secure and ticking over, to more comprehensive packages that include content updates and development.

### Why choose GMT Solutions?

We've got over 15 years' experience of building and maintaining websites, ranging from simple informational sites to complex e-commerce sites.

Your website is one of your most important business assets, and we know the best ways to keep it safe and secure.

We're constantly researching the latest technologies and web trends, to ensure that our customers' sites are kept current and using the best tools available.

Our current client list includes sites from individuals, sole traders, small businesses, charities and larger businesses, so you can be assured that we've got experience across a range of organisations.

All plans include our top rated UK web hosting, phone and e-mail support for any queries or problems you may have, and all the essential updates to keep it protected from malware and hackers.

We love WordPress websites - so the prices below are based on these. If your website is built on a different platform, please get in touch for an individual quote or to see if you could benefit from moving to WordPress.

## Website Maintenance Plans

We offer four varied plans to choose from, whether you have a small website of a few pages, or a large e-commerce site with hundreds of products. If you don't see a plan to suit you, please get in touch so we can create a bespoke option to suit your needs.

	Starter	Essentials	Professional	Expert
